15.0 Landscaping, Tree Trimming and Irrigation

In accordance with our Covenants, our HOA landscape requirements and responsibilities serve to protect the uniformity, aesthetics and property values of our community.

Our HOA standards are intended to utilize Florida friendly landscaping, which means selecting the right trees and plants for the right place, watering efficiently, fertilizing appropriately, managing pests responsibly, mulching and recycling yard waste.

- ◆ All plantings should meet or exceed Collier County general landscape requirements. Although these requirements can be found on-line, these standards basically refer to the use of native plants, shrubs and trees. We have on our website a native plant list, published by Collier County. The Strand Community is considered Mid Zone. Qualifying native canopy trees are listed as "Trees-Large." Every residence within our community must have at least 1 native canopy tree depending on the impervious area of your lot. Usually, an Oak is used to fulfill this requirement. However, as previously stated, all trees listed as "Trees-Large" will qualify under Collier County guidelines.

- ◆ No native canopy trees can be removed without Board approval. The failure to obtain Board approval may result in a fine or other required remediation issued by Collier County Code Enforcement.

If a residence has only 1 canopy tree and the Board permits removal, this tree must be replaced with another suitable canopy tree somewhere on the property.

- ◆ All homeowners redesigning or installing landscaping must ensure the landscaper is insured and properly licensed. All landscaping must adhere to our HOA's minimum landscape requirements.

100% along the pervious area of a residence, excluding lanai/pool areas, must be landscaped in compliance with our community standards.

- ◆ All exterior equipment, such as A/C units, generators and pool equipment shall be surrounded by plantings so as not to be seen from the street or by neighbors. Minimum 10 gallon hedges, 4' on center and 5' in height is the preferred method of landscape around equipment.

- ◆ Back yard property must be adequately landscaped and maintained.

- ◆ All landscaping must meet the standards for Florida #1 or better, as established by Collier County's Grades and Standards for nursery plants. The #1 designation is a rating to guarantee a buyer gets good quality from either a nursery or landscape contractor. The rating should appear on the shrubs or trees purchased. Also, the grade should be specified on the landscaper's invoice.

It is our Board's policy that residential property should include buffer shrubs, accent trees, shrubs and seasonal or annual plantings throughout the property. Although the Board is hesitant to require a specific number of different plantings, it is our Board's policy that every homeowner must maintain an aesthetically pleasing landscape.

◆ Palms and coconuts will be trimmed once a year, in late Spring, at the homeowner's expense. This service will be provided by the HOA's designated landscaper. Any additional cuttings or trimmings deemed necessary will be at the discretion of the homeowner.

Hardwood tree trimming will be performed, as needed, at the discretion of the Board and at the Board's expense.

◆ Rain sensors are the Board's responsibility, and will be replaced and/or relocated as determined by the Board's landscaper.

◆ In regards to irrigation repairs and costs, our current landscape contract states:

- (a) All charges and costs for repair of irrigation piping, fittings or valves upstream (before) of the homeowner's electric automatic irrigation valves, and replacement of rain sensors are the responsibility of the Homeowner's Association.
- (b) All charges and costs for repairs of irrigation automatic valves and associated parts, irrigation timing clocks, and associated wiring on the homeowner's property shall be the homeowner's responsibility.
- (c) All charges and costs for repairs and replacement of irrigation piping or tubing, fittings, irrigation sprinkler parts downstream (after) of the homeowner's irrigation electric automatic valves shall be the responsibility of our landscaper.
- (d) If the need for any irrigation replacement or repair is due to actions of the homeowner or by work performed by outside contractors/vendors, the homeowner will be directly responsible for all charges and costs.

◆ Any debris that is a result of a homeowner performing regular lawn maintenance duties on their property will be removed during the regularly scheduled debris pickup performed weekly.

Debris from another vendor that was contracted by a homeowner will not be picked up as part of our regular debris removal. The Association will be notified, and Contractor will, upon request, provide an estimate for the removal of said debris.

Debris that is a result of a homeowner doing tree service work may result in an additional charge for debris removal if both the Association and the Contractor deem it excessive. Tree service debris removal is not covered in any part of this Agreement and smaller piles that are removed will be done so as a courtesy.

Debris that is a result of a homeowner doing landscape renovations may result in an additional charge for debris removal if both the Association and the Contractor deem it excessive. Landscape renovation debris removal is not covered in any part of this Agreement and smaller piles that are removed will be done as a courtesy.
