March 21, 2023

To all Property Managers:

Beginning May 15, 2023, we will be conducting hard cutbacks on specific woody plant material to promote growth and flush out new foliage. Sometimes these cutbacks seem drastic to homeowners, but they help the plant during the rainy season.

As with everything that has to do with Mother Nature, there can be no guarantee on how the plants will respond. Younger plants will respond better than older plants. Leo Jr. is not responsible for those plants that do not recover from this practice and there may be plants that need to be replaced. However, the majority of the plants will respond remarkably well.

If a homeowner does not want cutbacks on their property, please have them notify us via email by May 1, 2023. They should email our office at [office@leojrlandscaping.com](mailto:office@leojrlandscaping.com).

Sincerely,

*Clay Zook*

Clay Zook
