Dear Customer,

Due to Hurricane Milton, high winds and the salt in the air has severely damaged plant material throughout Collier County. Salt will burn and damage the plant life and cause defoliation. This will continue over the next few weeks. Our crews are actively removing debris daily from areas.

We will continue to monitor the landscaping some areas may or may not come back. It is very important that we assess the damages and prune accordingly to promote new growth.

Please feel free to contact our office if you have any questions.

Kind Regards,

Leo Jr. Landscaping
