Dear Customers:

Unfortunately, at this time we are experiencing severe drought conditions which may get worse over the next few weeks. We are maximizing our irrigation systems by running during the day and night. With lakes getting low we must be very cautious. Please be aware that you will see irrigation running more frequently. If you notice any irrigation issues, please send them to our office via email. We may experience some water restrictions in the near future if conditions persist. We encourage hand-watering of more sensitive materials such as flowers, etc. Hopefully rain will be headed our way soon.

Best regards,
Leo Jr. Lawn and Irrigation Services
